Projects

Ed Tech Platform (In Progress) ([link](#))

- **Developing** an online learning platform using **Next.js**, with distinct user roles for teachers and students to facilitate interactive learning and resource management.
- **Integrating** secure authentication with **Clerk** and **streamlining** payment processing using **Stripe** to ensure smooth financial transactions.
- **Designing** a modern, **responsive** interface with **shadcn UI**, aimed at enhancing user experience and **accessibility across devices**.
- Collaborating with a team to implement features like **course management**, interactive lessons, and real-time feedback mechanisms.

E-Commerce Website

- **Built** an e-commerce website featuring an **admin interface** to manage over **1,000 products**.
- Added functionalities for product management (**add, update, delete**), **optimizing** inventory processes.
- **Implemented** smooth **shopping cart** and **secure checkout** processes to enhance user shopping experience.

Authentication System

- **Engineered** an authentication system using **Node.js, Express.js, and JSON Web Tokens (JWT)** to handle user **sign-up, login, and secure session management**.
- Implemented functionalities for **account deletion** and **user detail updates**, providing a flexible user management system.
- Developed features for **password changes** and **resets** using **OTPs** and **verified links**, enhancing account security and user convenience.

Portfolio ([link](#))

- Designed and developed a personal portfolio website using **Next.js, Framer Motion** to showcase various projects and skills.
- Implemented a responsive layout with **Tailwind-CSS**, ensuring optimal viewing across different devices.
- Integrated a contact form with **Nodemailer** to enable easy communication with potential clients and employers.
- Optimized site performance and **SEO**, leading to a 30% increase in web traffic and higher visibility in search engines.

AI-Powered Chatbot

- Created a text-to-text chatbot utilizing the **Gemini API**, managing over 500 queries with high accuracy.
- Improved customer engagement and satisfaction through precise text-based responses.
- Continuously refined the chatbot's responses based on over 50 user feedbacks, improving response accuracy by 15%.

Certifications and Awards

- Meta Front-End Developer Professional Certification ([link](#))
- Build AI Apps with ChatGPT, Dalle-E, and GPT-4 Certification ([link](#))
- Solved 100+ question of different platforms – (Leet Code, GFG, Hacker rank).
